

DECLARATION OF BUSINESS MODEL & SOURCE OF FUNDS
MERCHANT ACCOUNT ACTIVATION SUBMISSION FOR MULTI-CURRENCY RAILS

To: Fincra Compliance & Risk Assessment Team
Subject: Source of Funds, Revenue Model & Compliance Overview for NoteStandard Accounts

1. Executive Business Overview

NoteStandard Technologies Limited is a licensed multi-currency enterprise banking and financial operating platform. We provide businesses, institutions, and platforms across Africa and international markets with infrastructure for payment collection, multi-currency wallets, automated treasury rebalancing, and virtual accounts.

2. Monetization & Revenue Generation Model (How We Earn Money)

A. Payment Transaction Processing Fees (0.5% - 1.5%)

NoteStandard charges a standard processing fee on all incoming payins/collections (Cards, Bank Transfers, Mobile Money across NGN, GHS, KES, ZAR, UGX, TZS, ZMW, XOF, XAF). Fees are automatically deducted upon successful settlement.

B. Foreign Exchange Spread & Currency Conversions (0.5% - 1.0%)

We earn an FX margin on cross-border currency conversions (e.g., NGN/USD, EUR/NGN, GHS/USD) executed through our locked FX quote engine, providing transparent rates to merchants while capturing spread revenue.

C. Virtual Account Issuance & Monthly Maintenance Fees

Corporate accounts pay nominal account setup and recurring monthly maintenance fees for dedicated NGN, USD, EUR, and GBP virtual collection accounts issued on the platform.

D. Enterprise SaaS Subscription Fees (\$99 - \$999/month)

Tiered monthly software subscription fees collected from enterprise merchants for accessing advanced features such as automated treasury rebalancing, developer APIs, custom ERP integrations, and multi-user RBAC controls.

3. Source of Funds & Liquidity Origin

All funds deposited into and processed through our Fincra collection accounts originate strictly from verified, legitimate business transactions. These include: (1) End-user payments for digital goods, software, and commercial services; (2) Corporate treasury funding deposited to maintain liquidity buffers; and (3) Merchant settlement receivables processed through approved banking rails.

4. AML / KYC Compliance & Risk Controls

NoteStandard enforces strict compliance standards: 100% of corporate clients undergo Tier-3 KYC verification (CAC Certificate, Form CO7, Director BVN/NIN, Proof of Address). Real-time sanctions and PEPs screening hooks (OFAC/ UN watchlists) automatically block high-risk transactions. All processing is audited via an immutable double-entry accounting engine.

OFFICIAL SIGN-OFF & AUTHORIZATION
